## Senior Citizen's Day at South View High School

Culinary Arts students had the privilege of serving our seniors from the community lunch on March 31, 2017. They were treated by the talents of the Black History Program participants. SGA took them through rounds of Bingo with door prizes. The grand finale was eating the award winning pulled pork, fried chicken, potato salad, slaw, hush puppies, tea, and lemonade from Ms. Weathersby and her students in Culinary I. They say, "Lunch is a highlight of visiting South View. Being able to eat delicious food served by the sweetest kids is such a blessing." We enjoy them each year and are grateful to work with SGA & Mrs. Aldridge who sponsored the event.

## ISTA Students Participate in EATON Engineering Project

The Integrated Systems Technology III class from Jack Britt High School divided in two teams for the EATON Engineering Project. This capstone project includes three visits to EATON. Visit one is a tour of the facility with an introduction to several engineering problems. During the second visit, each team selects one problem, gathers the necessary information to find a solution, and establishes communication with a point of contact for further questions. The third and final visit is the presentation to a group of engineers and employees at EATON Corporation. Our thanks to EATON Corporation for this wonderful student centered, real world collaboration with our business and industry community.

## Carpentry Students Assist Gold Medal Winner

South View High School students in Mr. Bill Wamsley's Carpentry I & II classes assisted a Core Construction student (Robert Castaneda) in winning a Gold Medal at the FCCLA State Competition in Greensboro. Carpentry students helped Robert build a pallet chair from recycled pallets. Mr. Wamsley and the students worked with Robert to improve his carpentry skills with the hand/power tools. Special thanks to Benjamin Burnette, Jesse Battles, Logan Gasho and Chase Mitchell for assisting with this project.
