**Curriculum Selection**

***Required***

Select three (3) courses that you prefer (mark the appropriate lines). Students are guaranteed at least one (1) of these choices.

\_\_\_ **“Robo Mania!”** Imagine It, Engineer It and Make It Go! Design, build, program and test robots using the Lego Mindstorms building system. Develop creativity and problem-solving skills along with other important math and science knowledge.

\_\_\_ **Games for the Brain** - Creative, exciting, innovative, and stimulating games to challenge critical thinking, deductive reasoning, strategic planning, and much more. Come and have some fun using your brain.

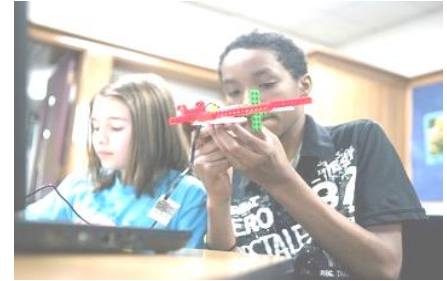

\_\_\_ **CSI** - A crime has occurred at camp and we need your help!! As a Crime Scene Investigator you will be tasked with solving the mystery through scientific observation, sample examination, analysis, lab work, testing, interviews and field work.

\_\_\_ **“Chem4kids”** Enter the professor's laboratory to experience icky, bubbling, slimy, gooey, hands-on science experiences for the "young chemist". Participants will discover the world of matter, it's physical and chemical properties, and the "boom-bang" effect of chemical reactions!

\_\_\_ **Electrifying!** Explore the science of electricity while creating circuits to power fans, flying saucers, sirens, radios and light shows that pulsate to music.

\_\_\_ **Thread Art: When Math and Art Collide:** What do a hammer and nails, knots, shapes, and line designs have in common? They are all ways you can express your creativity through math and art. Learn to use a hammer and nails to create cool name boards with string, tie knots to create friendship bracelets, crochet fun shapes, and so much more! Leave with an awesome piece of art to show off to your family and friends.

\_\_\_ **Invent, Create and Video** – Put your imagination to work and invent one of a kind video games with Bloxels, create your own movie using green screen technology and complete robotic missions using coding programming.
